

Downtown Kayak Launch Projects Update: 10/19/17

Northbank Riverwalk @ Gefen Park

Project is nearing completion. Pedestrian bridge has been removed, Riverwalk has been rerouted on-grade around the small cove and an accessible pathway is now being created from the Riverwalk to the shoreline area for kayak launching. See photos below.

Southbank Riverwalk @ School Board Building

Project is under design and permitting has been initiated. Multiple adaptive launch designs were considered and feedback was obtained from Commissioner Pringle. The selected design utilizes a concrete dock with imbedded launch ramp, transition seat and grab bars (see photos below of adaptive launch concept). Once design is complete, construction funding has already been approved in the CIP.
