

Adoption of Legislative Committee Recommendations

When a bill is introduced which the Committee believes is of importance to the Commission, it will draft an opinion explaining the issues presented by the proposed bill and the recommended response.

The Committee will forward a copy of the opinion to all members. Any member may in the next two days request a special meeting of the full Commission to decide whether the opinion should be adopted, and if not, what further action, if any, should be taken. Such meeting will be held within three days of the date the meeting was requested.

If no request for a special meeting is made as provided above, the opinion and recommendations of the Legislative Committee will be considered as being adopted by the Commission and Commission officers are authorized to act accordingly.
