

# Duval County District 10 Demographics

## Source

2013-2017 American Community Survey 5-Year Estimates, U.S. Census

## Methodology

Compiling this demographic data was a multistep process. Typically, gathering data via the U.S. Census is done on the county level. In this particular case, data was only needed for a specific City Council district within Duval County. Unfortunately, the U.S. Census does not have counties broken down into districts. Instead, they have Census Tracts which are small areas that are used to help break down a county into manageable data tracking areas. To find the data specifically for City Council District 10, the Census Tracts that lay within District 10's borders were used. There are roughly 18 Census Tracts within District 10. Of those 18, there were 6 Census Tracts that were halfway in District 10 and halfway in neighboring districts. For these 6 Census Tracts, the datasets were split in half to provide a more accurate approximation of the specific demographics. The 6 Census Tracts that were split in half are colored red in the tables below. To get the demographic data for District 10, data was gathered from all 18 Census Tracts and combined to get total figures.

## Table Breakdown

There are two sets of tables housing all of the demographic information for District 10. The first set of tables on pages 2-14 show all of the gathered data. These tables include the data for each individual Census Tract as well as the totals which represent the data for the entire district. Having the breakdown of the Census Tracts can be beneficial when trying to find data for specific areas within the district. The second set of tables on pages 15 and 16 only show the district totals without the individual Census Tract information. Here is a list of the tables that are included in this report:

- Population
- Household / Family
- Race & Ethnicity
- Educational Attainment (25yo+)
- Educational Attainment (18-24yo)
- School Enrollment
- Veteran Status / Disability Status / Benefits / Below Poverty Level
- Income
- Employment Status / Unemployment Rate
- Occupation
- Industry
- Class of Worker
- Means of Transportation to Work

# Population
