Meeting #	Page #	<u>ltem #</u>	Dept./Area	Comments	Use of Operating Reserves
		· · ·		Beginning Balance Meeting - 8/9/24	5,403,402
Meeting #2	·····	·	Dept.	Comments	· · · · · · · · · · · · · · · · · · ·
2	N/A	Floor	Mayor's Office	Placed into a Designated Contingency \$30,188 related to Florida League of Mayor's and United States Conference of Mayor's.	
2	N/A	Floor	Mayor's Office	Placed into a Designated Contingency \$3,600 for Auto Allowance within the Mayor's Office.	
2	N/A	Floor	Mayor's Office	Removed DEI position and funding within the Mayor's Office. This reduced use of Operating Reserves by \$232,121.	(232,121)
2	22	1 thru 3	Police and Fire Pension Fund	Removed and replaced Schedule AB and AC to make various adjustments based on benefits and internal service costs amounts being finalized after the budget was submitted by the Police and Fire Pension Fund. Also, made other format changes to the schedule.	
2	35	1	Finance Department	Removed from Capital Outlay Carryforward schedule (AF) \$400,000 related to capital improvements that is no longer needed.	
	35	<u> </u>	Finance Department	Made technical changes to Schedule B1a	· · ·
2	41 28	Floor1	Administrative Services Fleet - Vehicle Replacement	Removed two positions and \$153,660 from salaries and benefits within Administrative Services and adding two positions and \$115,349 for salaries and benefits within OED for EBO. Net positive impact of \$38,311. Revised Budget Ordinance Schedule AF to remove the capital outlay carryforward request of \$63,402 as these funds are already spent/encumbered.	(38 <u>,31</u> 1)
2	61	1	Copy Center	Adjusted the budget to reflect the full amount JEA is contributing to cover the cost of the hurricane guides. This resulted in a decrease of \$50,000 in the printing and binding commercial expense account, which would be offset by a decrease of \$50,000 in the interfund – internal service funds revenue account. The Fire and Rescue Department within the General Services/GSD Fund (00111), who is charged for the City's portion of the hurricane guides cost, has a corresponding decrease of \$50,000.	(50,000)
2	63	Floor	Information Technologies	Reduced the number of proposed positions related to bringing in-house managed desktop services and deployment services by four positions at the request of the Department.	,, , , , , , , , , , , , , , , , ,
_ 2	65	1	Radio Communications	Increase the employee cap by one position to be consistent with Ordinance 2024-425-E. This was offset with a decrease of one position within the Information Technologies Fund (53101) as was done in the bill. This required removing \$57,911 in salaries and benefits within the Information Technologies Fund and transferring that amount into Radio Communications Fund (53102) so that salaries and benefits could be increased by a corresponding amount.

### Carlucci, Joe - CCDE

From:Derbaum, Michael - PWENSent:Tuesday, July 30, 2024 7:40 AMTo:Carlucci, Joe - CCDECc:McDaniel, Dave - PWMLSubject:RE: Atlantic Blvd Medians

Councilmember Carlucci,

I apologize for not getting this to you last week. I have finished the plans revisions and updated the cost estimate with the new quantities. The new cost estimate is slightly below \$300,000. This is compared to the previous bid of \$583,000 from before we removed the median closest to the railroad. We currently have \$148,000 available. This leaves a \$150,000 shortfall from the available budget to my new cost estimate.

I would like to request an additional \$250,000. That additional \$100,000 would cover us in case bids come in higher than expected and would also cover CEI (Inspections) and any potential unforeseen cost overruns during construction. These numbers are also broken down below. I would be happy to discuss this further if you have any questions at all.

- Previous Bid: \$583,000 (About half of the project has since been removed based on discussions with CM Carlucci)
- Current Cost Estimate: \$300,000
- Available Budget: \$150,000
- Shortfall (For Construction Only): \$150,000
- Request for Additional Funding: \$250,000

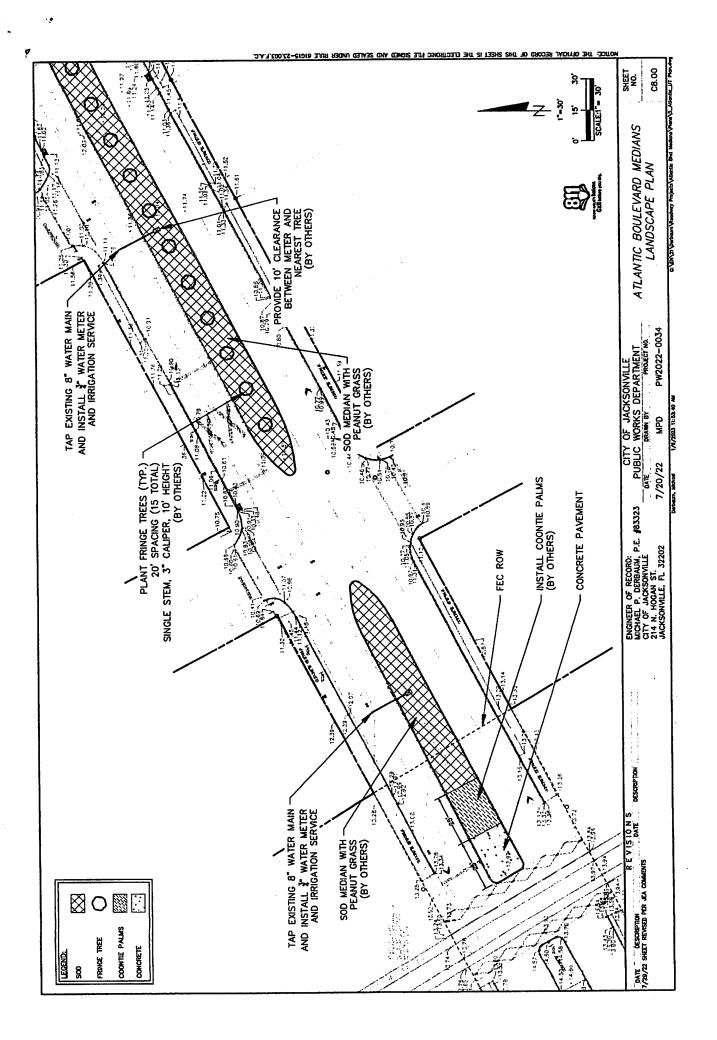

Michael Derbaum, P.E. City of Jacksonville | Public Works Department 214 N. Hogan St., 10<sup>th</sup> Floor Jacksonville, FL 32202 904-255-8703 www.coj.net

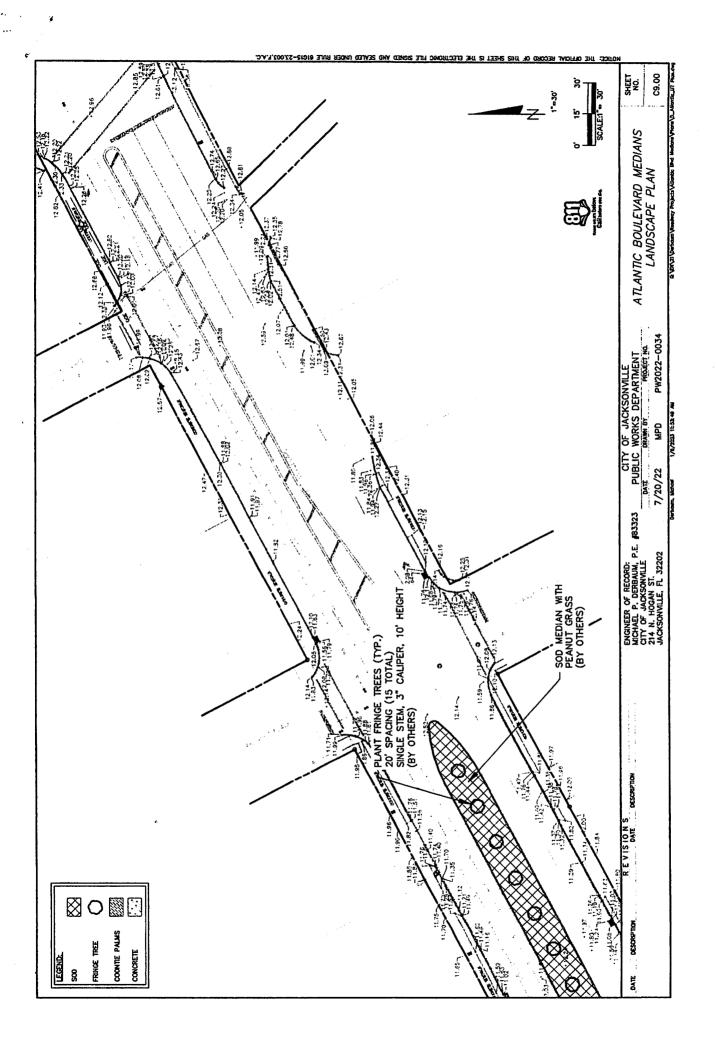

From: Carlucci, Joe - CCDE <JoeCarlucci@coj.net> Sent: Monday, July 29, 2024 1:00 PM To: Derbaum, Michael - PWEN <MDerbaum@coj.net> Subject: RE: Atlantic Blvd Medians

**Hey Michael** 

Just making sure I didn't miss anything - new another day or so to get this sent over?

Joe Carlucci Council Member, District 5 117 West Duval Street, 4<sup>th</sup> Floor Jacksonville, Florida 32202 (Office) 904-255-5205

## 3.0 PUBLIC INVOLVEMENT

Public involvement is a crucial element in any planning process. The public involvement process provides residents the opportunity to have their voices heard and to be included in the decision-making process.

For this study, a survey was developed and administered online via SurveyMonkey and hosted on its own webpage **20isplentyjax.com**. The survey was promoted both digitally and physically through promotional postcards (right) and web-based platforms.

The survey received a notable **2,619 responses** during the four months it was live (May 2023 through August 2023). The survey consisted of 10 questions (five geodemographic questions, three Likert scale questions, and two openended guestions).

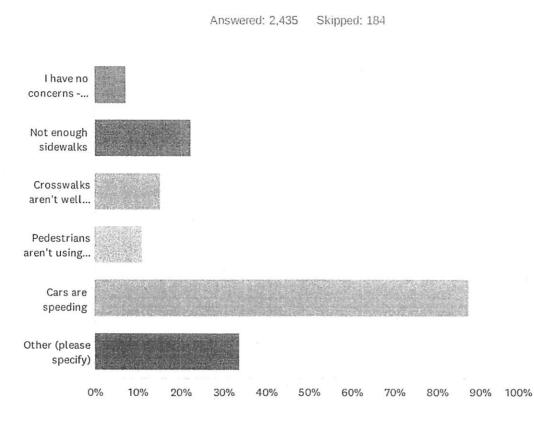

The overall findings of the survey are provided below. Responses are summarized in further detail in this section. The full survey results and questions are available in Appendix B.

# Q5 Which of the following concerns do you have regarding pedestrian safety in your neighborhood? (Check all that apply.)

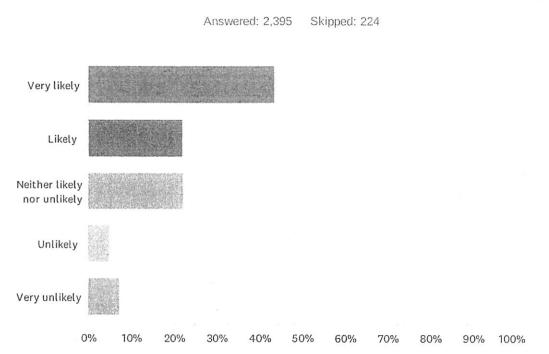

ANSWER CHOICES	RESPONSES	: : ;
I have no concerns - pedestrians are safe in my neighborhood.	7.23%	176
Not enough sidewalks	22.34%	544
Crosswalks aren't well marked	15.28%	372
Pedestrians aren't using crosswalks	11.01%	268
Cars are speeding	87.47%	2,130
Other (please specify)	33.68%	820

Total Respondents: 2,435

#	OTHER (PLEASE SPECIFY)	DATE
1	People walking in the street instead of using sidewalks when available.	8/30/2023 2:32 PM
2	cars parked on street and cars that are impeded DO NOT give right away.	8/29/2023 4:00 PM
3	The stop sign at the intersection of Bernice and Bernice is often ignored as cars speed around.	8/24/2023 8:52 PM
4	Pedestrians don't use the sidewalk	8/24/2023 7:35 AM
5	Cars often block sidewalks causing pedestrians and children to walk in the road	8/23/2023 10:01 PM
6	Cars blocking the only sidewalk	8/23/2023 9:26 PM
7	The City of Jacksonville REFUSES to enforce the speed limit; no officers present, no support	8/23/2023 9:13 PM

1

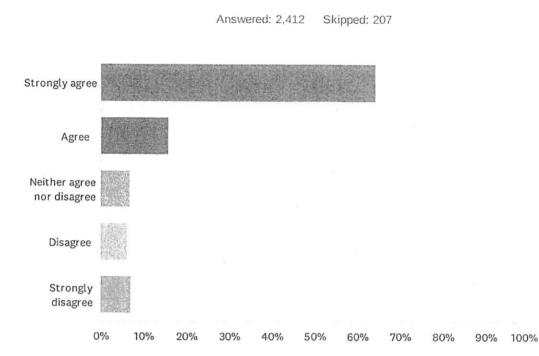

## Q8 If the City reduces speed limits on residential streets, how likely are you to take up active travel such as walking or bicycling?

ANSWER CHOICES	RESPONSES	
Very likely	43.59%	1,044
Likely	22.00%	527
Neither likely nor unlikely	22.21%	532
Unlikely	4.93%	118
Very unlikely	7.27%	174
TOTAL		2,395

20 Is Plenty Jax

### Q6 Please rate how strongly you agree with the following statement: The City of Jacksonville should lower the speed limit on all local residential streets to 20 MPH.

ANSWER CHOICES	RESPONSES	
Strongly agree	64.14%	1,547
Agree	15.75%	380
Neither agree nor disagree	6.84%	165
Disagree	6.18%	149
Strongly disagree	7.09%	171
TOTAL		2,412

### 4.1 Action Item 1: Speed Limit Policy

Action Item 1: Adopt a city-wide policy mandating a 20 mph speed limit on all residential roads

## The first Action Item is to adopt a city-wide policy which mandates a 20 mph speed limit on all residential roads.

This Action Item includes:

- Adopting an ordinance reflecting the following changes to existing local policies:
  - A text amendment to the City of Jacksonville Traffic Code (specifically, Sec. 804.402 of the Jacksonville Code of Ordinances) adopting the 20 mph speed limit on residential roads.
  - A text amendment adding the city-wide speed limit to the Transportation Element of the Comprehensive Plan.

2045 COMPREHENSIVE PLAN

The Hennedik Lancy Curry Mayer Miller & Killingereith Glenike of Fleeniky & Durshummer AACSONNLE PLANING AND DEVELOPMENT DEPARTMENT 1010 (1949) ELVEY Sing Of Jackson in 6 July (201)

### Example Ordinance Language:

- Seattle, WA: Subject to <u>Section 11.52.020</u>, and except in those instances where a different maximum lawful speed is provided by this Subtitle I or otherwise, no person shall operate any vehicle at speed in excess of twenty (20) miles per hour on any non-arterial street<sup>19</sup>.
- Portland, OR: The City of Portland establishes by ordinance a designated speed [of 20 miles per hour] on non-arterial streets under the jurisdiction of the City of Portland in a residence district<sup>20</sup>.
- Salt Lake City, UT: On all Streets and at all places the prima facie speed limit shall be twenty (20) miles per hour, except on such other streets or places as otherwise posted or marked as directed by the city transportation engineer<sup>21</sup>.
- Fayetteville, Arkansas: Where no special hazard exists, speeds of 20 miles per hour in any residential or business district shall be lawful, but any speed in excess of such limits shall be prima facie evidence that the speed is not reasonable or prudent and that it is unlawful<sup>22</sup>.

<sup>&</sup>lt;sup>22</sup> <u>Fayetteville, Arkansas Code of Ordinances Sec. 71 065</u>, Full adopted ordinance (Ordinance 6488) with council findings is provided in **Appendix C.** 

<sup>&</sup>lt;sup>19</sup> Seattle, Washington Municipal Code Sec. 11.52.060

<sup>&</sup>lt;sup>20</sup> Portland, Oregon Ordinance 188774. Full adopted ordinance with council findings provided in **Appendix C.** 

<sup>&</sup>lt;sup>21</sup> Salt Lake City, Utah Code of Ordinances, Sec. 12.36.020.3

### 20 TWENTY PLENTY

### 4.2 Action Item 2: Sign Implementation Strategy

Action Item 2: Develop a sign implementation strategy for systematically installing new speed limit signs and increasing sign density (as needed) across the city.

According to Florida Statute, new speed limits **do not take effect until the zone is posted** by the authority changing the speed<sup>23</sup>. Therefore, it is paramount that the City of Jacksonville develop a sign implementation strategy once the speed limit policy has been adopted.

The sign implementation strategy will focus on accomplishing two goals: replacing existing signs and increasing sign density. It has been found that **lowering speed limits and increasing sign density alone** (absent any marketing campaigns, additional enforcement, retimed signal progressions, or engineering changes) resulted in **lower speeds and fewer crashes**<sup>24</sup>.

Lowering speed limits and increasing sign density alone results in lower speeds and fewer crashes. - Speed Limit Case Studies, Seattle, WA

- Sign Replacement Strategy: Develop a sign replacement strategy that best works for the City of Jacksonville. City-wide sign replacement is completed within one to three years in other cities<sup>25</sup>. For example, the city of Nashville replaced their signs in phases over one year based on council district focusing on central, urbanized districts and expanding outward<sup>26</sup>.
- Increasing Sign Density: Establish a target sign density to spread driver awareness of the lower speed limit. An example goal sign density is one sign per every 0.25 miles (Denver, CO<sup>27</sup>).

### Sign Replacement Costs

The cost for implementation of new speed limit signs is estimated at **\$190 per sign** and includes installation<sup>28</sup>. All identified **2,715 miles of candidate roadways** (those roadways that are currently 25 mph or 30 mph and in a residential area) were included in the calculation. An assumption of the new sign spacing of 0.33 miles was utilized (8,200 signs). Overall, the total estimated cost to replace existing signs and increase sign density is \$1.6 million.

<sup>23</sup> Florida Statute 3.16.189 (3) Posting of Speed Limits

24 Speed Limit Case Studies, (Seattle; 2020).

- <sup>25</sup> <u>Denver. CO</u>: Plans to replace 2,000 signs over a "few years". <u>Eugene, OR</u> replaced the signs within "fall 2020" (number of signs were not included). <u>Tigard, OR</u> estimated one year to replace signs.
- <sup>26</sup> Speed Reduction Feasibility Study, (Nashville, Tennessee; 2019).
- <sup>27</sup> Denver Vision Zero: Speed Limit Reduction Feasibility Study (Denver, Colorado; 2021).
- <sup>28</sup> Costs provided by City of Jacksonville staff.

Speed Limit Guiding Document Summaries

Appropriate Speed Limits for All Road Users, FHWA

Overview: Provides safety benefits, application examples, and considerations for setting appropriate speed limits.

Findings:

- Speed control is one of the most important methods for reducing fatalities and serious injuries.
- Speed is especially important on non-limited access roadways where vehicles and vulnerable road users mix (i.e., local streets).
- A driver traveling 30 mph who hits a pedestrian has a 45% chance of killing or seriously injuring them. This drops to 5% at 20 mph.
- Speed limit changes alone can lead to measurable declines in speeds and crashes.
- Traffic fatalities in Seattle, WA decreased by 26% after the city implemented speed management strategies and countermeasures, including reducing the speed limits on all non-arterial streets to 20 mph.
- Encourages the Safe Systems Approach when setting speed limits.
- To achieve desired speeds, agencies often implement other speed management strategies concurrently with setting speed limits including self-enforcing roadways, traffic calming, and safety cameras.

### City Limits, Setting Safe Speed Limits on Urban Streets (NACTO)

Overview: Provides municipalities with guidance on how to strategically set speed limits on urban streets using the *Safe Systems Approach*.

Findings:

- Reducing vehicle speed reduces the frequency and severity of traffic crashes.
- Reducing speeds involves design and regulation.
- People tend to decide how fast they drive based on the design of the roadway and other cues such as posted speed limit signs and the speed other drivers are traveling.
- Lowering speed limits alone has a dramatic impact on lowering fatalities.
- The Safe Systems Approach is the guiding philosophy behind safer streets.
- A 5 mph increase in the maximum speed limit is associated with an 8% increase in the fatality rate on interstates and freeways and a 3% increase on other roads.
- Small reductions in speed result in large safety gains.
- Local streets are more impacted due to different types of road users sharing the space and interacting frequently.

### Speed as a Safety Problem (ITE)

Overview: A resource provided by ITE describing speed in relation to safety, vision zero, and road users.

Key Findings:

ite=

A Community of Transportation Professionals

- Speed is a safety problem. Crash severity increases as vehicle speed increases, especially for non-motorized users.
- The percentage of speed-related fatalities is highest on local road types compared to all other road types.
- A core element of Vision Zero is creating safe speeds for specific road context.
- The survival rate for a pedestrian being hit at 40 mph is 20%. When this is compared to a vehicle traveling at 20 mph, the likelihood of survival for a pedestrian increases to approximately 90%.
- Speeding-related crashes involving a bicycle or pedestrian occurred most often on local roads, on roads between 30 to 35 mph, and on non-intersection points of the road.

*Speed Zoning: For Highways, Roads, and Streets in Florida (FDOT)* Overview: Provides guidelines and recommended procedures for establishing uniform speeds on municipal, county, and state roads within Florida.

Findings:

- The default speed limit on Florida residential roadways is 30 mph.
- Local municipalities can set their own maximum speed limit for local streets as long as an engineering and traffic investigation determines the change in speed is reasonable and conforms to criteria set forth by the FDOT.
- The preferred way of determining speed limits is to use the 85th Percentile method<sup>18</sup>.
- When the mean speed of traffic is reduced, the number of crashes and the severity of injuries almost always goes down.
- The relationship between speed and crash risk can be modified to some extent by road environment and driver behavior.
- A change in speed limit almost always changes the mean speed of traffic.
- It is evident that lowering the speed limit will reduce crash risk.
- Within residential districts, a municipality may set a maximum speed limit of 20 mph on local streets.

<sup>18</sup> <u>Florida Statute 316.189</u>, "Establishment of municipal and county speed zones. (1) Municipal Speedthe maximum speed within any municipality is 30 miles per hour. With respect to residence districts, a municipality may set a maximum speed limit of 20 or 25 miles per hour on local streets and highways after an investigation determines that such a limit is reasonable. It shall not be necessary to conduct a separate investigation for each residence district."

### 4.4 Action Item 4: Enforcement Plan

Action Item 4: Partner with the Jacksonville Sheriff's Office (JSO) to create a residential speed enforcement plan to support the citywide 20 mph speed limit.

Enforcement is one of the five key components of the *Safe System Approach*. According to the National Highway Safety Administration (NHTSA), fair and equitable law enforcement

increases safety of the roadways by preventing, responding to, and expediting scene clearance. In addition, law enforcement officers have the shared responsibility to provide feedback to improve system design and operation based on the officer's experience in responding to crashes<sup>30</sup>.

Therefore, it is important to form a strong partnership with JSO to enforce lower speed limits to successfully implement the program. NHTSA recommends high visibility enforcement campaigns as successful strategies to support the *Safe System Approach*<sup>30</sup>.

**Everyone plays a role**—from community and advocacy organizations to **public** safety officials and transportation experts, road users, vehicle designers and developers, law enforcement, and first responders<sup>30</sup>."

### **Example Law Enforcement Strategies**

- **Fayetteville**, **AR**: Fayetteville Police Department provides a 30-day grace period following a reduction in speed limit before issuing citations for speed violations. Any increase in traffic patrol in residential areas will be complaint-driven via a non-emergency number<sup>31</sup>.
- New York City, NY: Utilized a period of targeted enforcement of the most common moving violations leading to modal conflicts. As a result, speeding summonses issued increased by over 93% from years preceding Vision Zero<sup>32</sup>.
- Portland, OR: Installed safety cameras on streets with high injury rates. At three study intersections, speeding was reduced by 47% to 68% after camera installation<sup>32</sup>.
- Wheaton, IL: Law enforcement began with the installation of new speed limit signs, which was carried out within a few weeks of council approval of the speed limit reduction <sup>27</sup>.

<sup>&</sup>lt;sup>32</sup> Nashville Speed Study, 2019

# TWENTY

### 4.5 Action Item 5: Public Outreach Program

Education is another one of the five Es of traffic safety and is an important step in implementing a lower speed limit. Therefore, the City of Jacksonville should develop a public outreach program which focuses on two primary elements:

- 1) Inform the public of the new speed limit policy
- 2) Educate them on the relationship between speed and transportation safety.

This program could potentially expand on the existing *20 is Plenty* program and branding developed through this study.

### Public Outreach Methods

Following examples from other *20 is Plenty* programs throughout the country, the City of Jacksonville can utilize the following methods for public outreach:

- Free Yard Signs: The number one method for public outreach amongst *20 is Plenty* programs is to provide free yard signs. These yard signs allow residents to show their support of *20 is Plenty* and encourage safe driving within their neighborhoods.
- Other Promotional Material: Other 20 is Plenty promotional materials include: car magnets to allow residents to show support while on the road or vinyl stickers that can be attached to cars, water bottles, computers, etc.
- Example Promotional Material Distribution Methods: Yard signs and other marketing materials can be allocated through the distribution methods for yard signs and materials include:
  - Providing them for free pick up at city permit centers, city hall, or libraries
  - Holding material pick-up events
  - Offering an online form to request signs and materials
- Additional Outreach Methods: The following outreach methods are used by Slow
  Down Dublin (Ohio) initiative:
  - Speed Lasers: Residents can become trained to use a handheld speedmeasuring device and borrow one to measure traffic speeds on a roadway
  - Police Ride-Alongs: Residents can request a ride along with local police to see for themselves how speed is enforced and how data is collected
  - Speed Concern Requests: Residents can request a speed study or report an issue on their street.
  - Speed Management and Dashboard: Provides an online dashboard displaying up-to-date speed data. More detailed steps for implementing a speed management dashboard are provided in *Action Item 4.*.
