• FISCAL YEAR 15/16 PROPOSED FUNDING SOURCES

• PROJECT DETAIL SHEETS

DIVIDER III UNFUNDED REQUESTED CAPITAL IMPROVEMENT PROJECTS

DIVIDER IV CURRENT CAPITAL IMPROVEMENT PROJECTS

DIVIDER V PROPOSED FIVE YEAR CIP - - INDEPENDENT AUTHORITIES

#### INTRODUCTION

Chapter 122 of the Jacksonville Ordinance Code requires that the Capital Improvement Program (CIP) be prepared annually by the city's Finance Department through submittals received by City departments, independent authorities and agencies.

The CIP is a multi-year forecast/financial plan of proposed capital projects. It includes project costs and schedules over a five-year period to meet the infrastructure needs of the City of Jacksonville and additional State of Florida growth management mandates.

This document provides the proposed Capital Improvement Program (CIP) of the City of Jacksonville for the five-year period beginning October 1, 2015 through the fiscal year ending September 30, 2020.

The proposed FY 16 CIP contains 48 updated and/or new projects totaling \$71,065,336. This reflects a significant investment to provide for the health, safety and quality of life for our citizens.

The 48 projects for FY 16 have proposed funding from a variety of sources which are primarily being funded from investment earnings revenue (Pay Go) and grants which will have helped to reduce the amount of future debt obligations.

#### **Definitions**

The CIP identifies major improvements and capital purchases needed to improve services to the community. Per Chapter 122, Part 6 of the Ordinance Code:

- a) **Capital Improvement** means a permanent addition, construction or fixture to real property or structures thereon that:
  - 1. has a useful life of more than ten (10) years,
  - 2. has an estimated purchase or construction cost of \$100,000 or more, or
  - 3. will be financed, in whole or in part, from bonds issued by the City.

Excluded from the term and definition of Capital Improvement shall be all routine resurfacing of streets, recurring annual items and routine maintenance and repair.

- b) **Capital Improvement Program** means a program to accomplish the implementation of each and every prioritized and approved Capital Improvement Project.
- c) **Capital Improvement Program Budget** shall be adopted on an annual basis as a separate budget or separate section within the annual budget. It shall list:

- 1. each Capital Improvement Project,
- 2. the estimated cost to purchase or construct each Capital Improvement Project, and
- 3. the anticipated source or sources of revenue to finance each Capital Improvement Project.
- d) **Capital Improvement Program Plan** means a complete description or listing of each Capital Improvement Project pursuant to the Capital Improvement Program.
- e) **Capital Improvement Project** means a planned undertaking of the City or an independent agency to purchase or construct a Capital Improvement.

#### **Process**

The CIP is prepared annually by the City of Jacksonville's Finance Department through submittals received from the City departments, independent authorities, and agencies. It contains updated and/or new projects for the next five year (projects are adopted in year one and planned for years two through five). This reflects a continued investment to provide for the health, safety and quality of life for our citizens. To assist in balancing and prioritizing needs across the City, departments identify projects by one of the following "Program Areas."

- a) **Drainage** Project that improves drainage conditions and reduces flooding.
- b) **Environment/Quality of Life** Project that would promote or improve the environment for the citizens of Jacksonville (e.g. water treatment plants/ash remediation).
- c) Government Facilities Project designated as government facilities with primarily government employee occupancy.
- f) **Parks** Project with buildings, grounds and/or recreational facilities within the park boundaries, also including the Preservation Project.
- d) **Public Facilities** Project for facilities designated for primarily citizen use and include facilities such as the county courthouse, arena, and baseball park.
- e) **Public Safety** Project relating to public safety including facilities.
- f) **Roads/Infrastructure/Transportation** Project dedicated to expanding and widening roads; interchanges, overpasses and intersection improvements; and also includes road resurfacing, sidewalks/bike paths, as well as landscaping/tree planting along road improvement projects.
- g) **Targeted Economic Development** Project is used to stimulate growth and revitalization by providing grants and loans for infrastructure, public improvements, and project development.
- h) **Art in Public Places**: Ordinance 96-1105-677 created a new Part 9, Chapter 126, concerning public art. Most new buildings have a percentage of their construction cost transferred to the Art in Public Places Trust Fund. These funds are used to implement a City-wide plan for the creation and placement of artworks as developed and administered by the Art in Public Places Commission. For Fiscal Year 2015, funding is identified for this program.

A typical capital project is planned and executed in the following phases:

- a) **Project Development** These are costs incurred by the City to identify project requirements, and to define a project's work scope including preliminary design studies, permitting requirements, data collection, public involvement, legal and technical documentation, cost estimates, environmental impacts, and assessment of alternatives.
- b) **Engineering/Design** These are costs incurred by the City to design a project in accordance with the scope of work set forth in the development phase. This includes professional consultant fees, legal and technical documentation, constructability review, data collection, advertising, assessment of alternatives related to project design, construction management services, and bid reviews.
- c) Land Costs incurred by the City for the purchase of land, easements and right-of-way. This also includes purchase price, surveys, appraisals, environmental audit, permitting, legal costs, maps, charts, aerial photography, and other costs such as wetlands restoration.
- d) **Construction** This includes costs incurred by the City for all construction related tasks required to place a project in service. This includes project construction contracts, professional and technical assistance, advertising, legal and technical documentation, costs, inspections, testing, and permitting.
- e) **Contract Administration** This includes costs incurred by the City for in-house project management, supervision and administration of capital projects. Administration costs include project design, technical reviews, construction management, construction inspection, technical specifications, surveying and mapping, cost of preparing reports and maintaining the capital projects management information system, eminent domain, contract management, monitoring, and processing the related financial transactions.

Departments complete a CIP request form with information above and prioritize projects requests prior to submitting them to the Finance Department. The projects are then reviewed by the Departments of Public Works, Planning & Development, and Finance for reasonableness related to costs, operating budget and level of service impact.

The FY 2016 – 2020 CIP contains projects from various city departments and agencies including:

- a) Downtown Investment Authority
- b) Regulatory Compliance
- c) Fire and Rescue
- d) Office of Economic Development
- e) Jacksonville Public Library
- f) Public Works
- g) Parks, Recreation and Community Services

PROJECT TITLE:

Downtown Street & Lighting

Improvements

DEPARTMENT:

Downtown Investment Authority

PROGRAM:

Roads / Infrastructure / Transportation

**CIE REQUIREMENT:** 

No

PROJECT COMPLETION DATE:

Ongoing

DISTRICT: 5 & 7

**PROJECT LOCATION:**Downtown Northbank & Southbank

USEFUL LIFE: 20 Years

PROJECT NUMBER:

PW0315

#### PROJECT DESCRIPTION:

The project enhances and improves lighting within Downtown Jacksonville and will utilize the engagement of CPTED (Crime Prevention Through Environmental Design) experts. Economically disadvantages areas of Downtown, including LaVilla, have areas where lighting is non-existent. Typica lighting improvements include: Develop lighting plan(s); Repair inoperable lighting; Increase wattages, where necessary; Decrease unnecessary light trespass and glare; Repair light fixtures; and Replace standard lighting fixtures with architecturally or place-making styles.

#### JUSTIFICATION

The Downtown Lighting project addresses the lighting deficiencies and safety concerns identified within the "Downtown Lighting Evaluation" ("Study") undertaken by the Jacksonville Sheriff's Office dated January 16, 2014. The Downtown Lighting project focuses on improving lighting within a focus area generally defined with the southerly and northerly boundaries of St. Johns River and Church Street, respectively; and the easterly and westerly boundaries of Liberty Street and Julia Street, respectively. The Study identified several areas of concern, particularly within the Hemming Plaza and Landing areas. The Downtown Lighting Program will address public safety through improving lighting within the Study area, and in particular the aforementioned particular areas of concern.

DEPARTMENT: PROJECT TITLE:

Jax Ash Site Pollution Remediation Public Works Environmental /Quality of Life

**CIE REQUIREMENT:** PROJECT COMPLETION DATE: DISTRICT: September 2019 7, 8, 9, 10

PROJECT LOCATION: **USEFUL LIFE:** PROJECT NUMBER: ERR002 Lonnie Miller, 5th and Cleveland, 25 Years Forest Street, & Browns Dump

#### PROJECT DESCRIPTION:

The ash remediation program is a Superfund Site composed of four areas of the City where municipal solid waste was burned in an incinerator as a method of treatment to render the material inert prior to disposal. The incinerator ash was deposited in areas of Jacksonville in the early to mid 1900's and consists of approximately 3,700+ sites in four areas: Browns Dump, Forest Street, 5th and Cleveland and Lonnie Miller. Due to the inefficient technology of the time, the solid waste materials were not rendered inert and resulted to contain elevated levels of heavy metals and poly nuclear backfill, place institutional and engineering controls on the parcel. The ash is used as daily cover for the Trail Ridge Landfill. The program is overseen by the EPA and administered by the Solid Waste Division.

PROGRAM:

#### aromatic hydrocarbons above federal regulatory levels. Shipyards Proj - Remediation Development Submerged Lands **DEPARTMENT:**Public Works

PROGRAM:

DISTRICT:

Environmental /Quality of Life

**CIE REQUIREMENT:** 

CIL KLQUIKLINILIVI

PROJECT COMPLETION DATE:

PROJECT LOCATION:
Jacksonville Shipyards Property

**USEFUL LIFE:** 30 years

September 2019

PROJECT NUMBER:

JEE074 03

#### PROJECT DESCRIPTION:

The Jacksonville Shipyards is a former ship repair yard facility encompassing approximately 30-acres of uplands and 18-acres of river bottom along Bay Street west of A.Philip Randolph Avenue. The site was operated as a commercial and industrial ship repair facility from 1880's until 1992 and as a result contamination from the historical use as a ship repair facility has impacted on-site soils, groundwater and river sediments above regulatory criteria that require assessment and cleanup. The assessment of the facility will determine the horizontal and vertical extent of impacted soils, sediments and groundwater on the site, sufficient to develop remedial action costs of cleanup using a Risk Management Option alternative method based on development footprints. Remediation within the development footprint would be protective of human health and the environment.

#### **JUSTIFICATION**

In 2010, the City assumed the obligations and responsibilities of the Brownfield Site Rehabilitation Agreement (BSRA) the Florida Department of Environmental Protection with the previous property owners and/or developers. Subsequently to receiving the property due to default by the previous property owners, the City has tried to market the property as is for re-development, however due to the unknown extent of the environmental remediation, accurate cleanup costs have not been available for developers to consider in the tier development plans, and as such, several deals have been halted due to the unknown costs. Additionally, the City has used the site for it's own purposes to the extent, the City realistically does not have the lender liability protection since the City has used the property as owner. Since the remediation costs will be unknown until the assessment is complete coupled with the FDEP requesting the City to continue with the requirements of the BSRA, has prompted the City to initiate assessment and remediation of the site for re-development.

PROJECT TITLE:DEPARTMENT:PROGRAM:Relocate Fire Station #45Fire and RescuePublic Safety

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

o October 2018

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:Sawpit Road50 YearsFR003801

#### PROJECT DESCRIPTION:

The project is for the construction of a new fire station south of the current location on Sawpit Road. Personnel and equipment would be transferred to the new location.

#### **JUSTIFICATION**

The need for this new fire station was identified in Phase I of the Public Protection Class Rate Reduction Study conducted in accordance with Section 421.103. A new fire station must be built in order to provide fire suppression coverage that meets ISO requirements for areas west of Black Hammock Island. homes built upon areas along Cedar Point Road and Boney Road have no ISO recognized fire protection. The current location is too far north and too close to the county line and does not efficiently cover a 5 road mile area per ISO requirement. Homeowners currently in this PPC 10 area could see their insurance premiums reduced by one half to two thirds when the fire station is built.

PROJECT TITLE:DEPARTMENT:PROGRAM:New Fire Station #47Fire and RescuePublic Safety

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

lo October 2018

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:Vicinity of Ethel Road50 YearsFR001901

#### PROJECT DESCRIPTION:

The project includes determining the proper location and subsequent purchase of a suitable property for the construction. A new Fire Engine and Rescue unit is included in this enhancement. Upon project completion, an additional 18 full time positions will be needed to staff the engine and rescue units.

#### **JUSTIFICATION**

Homeowners within five road miles of the new fire station could see their insurance premiums reduced by as much as one half to two thirds. For the 626 homeowners affected this could mean more than \$1,064,200 in annual savings by way of lower insurance premiums. The old fire station is currently being used by JSO corrections and is inside a secure fence location. Optimally the station would be relocated to maximize ISO ratings to the community. This improvement will satisfy ISO requirements in an area of the county where there is currently no recognized fire protection. The need for this new fire station was identified in Phase I of the Public Protection Class Rate Reduction Study conducted by a private consultant in accordance with Section 421.103, Fire and Rescue Capital Study.

#### PROJECT DESCRIPTION:

The project is the construction and staffing of a new fire station in the Merrill Rd. and Hartsfield community. A new Fire Engine and Rescue unit is included in this enhancement.

#### **JUSTIFICATION**

This project includes determining the proper location near Merrill Rd. and Hartsfield area, and subsequent purchase of a suitable property for the construction and staffing of a JFRD fire station. Build new Fire Station 65 as identified in the City's 2012-2016 Capital Improvement Program and Tri Data report to reduce response times for fire and EMS runs.

PROJECT TITLE:

Diesel Exhaust System - 93 Fire

Station Bays

**DEPARTMENT:**Fire and Rescue

PROGRAM: Public Safety

CIE REQUIREMENT:

October 2021

**DISTRICT:** Various

PROJECT LOCATION:

USEFUL LIFE:

PROJECT NUMBER:

Citywide 20 Years

ears IBD II

#### PROJECT DESCRIPTION:

Install diesel exhaust evacuation systems in existing fire stations that do not currently have them. Stations without systems are 1, 7, 9, 11, 12, 15 (rescue unit only), 17, 18, 19, 20, 44, 45, 46, 48, 49, 51, 52, 53, 54, 58, 31, 33, 34 and Tactical Support Facility (TSF). Stations without systems that the City of Jacksonville does not own are 55, 46, 56, 71 (rescue unit only) and 16. Stations without systems that may present historical preservation challenges when the modifications to the exterior of the building are made are 2, 4, 10, 13, 14, and 23.

PROJECT COMPLETION DATE:

#### JUSTIFICATION

Diesel exhaust from fire apparatus contains over 100 individual hazardous chemical components including carbon monoxide, nitrous oxide, benzene, sulfur dioxide, hydrogen sulfide and others. A large number of those components are listed by state and federal regulatory agencies as suspected carcinogens. The International Agency for Research on Cancer (IARC) classified diesel engine exhaust as carcinogenic to humans. An often-cited University of Cincinnati comprehensive study determined that firefighters are at significantly higher risk for developing testicular cancer, non-Hodgkin's lymphoma, prostate cancer, and multiple myeloma than non-firefighters. Toxic gases and particulate emitted in diesel exhaust are not confined to the bay area. Every time a door is opened or if the doors are not well sealed, those pollutants also seep into the office area and living quarters of the fire station.

#### PROJECT DESCRIPTION:

A multi-function, fire-rescue facility that accommodates three district functions: Required Training/Continuing Education for Field Personnel, Fire Prevention/Public Education for General Public, Backup 9-1-1 Center/Countywide Emergency Management (EOC activations).

#### **JUSTIFICATION**

With just one training ceneter located on the east side of the county (near FSCJ South Campus) fire suppression companies/EMS units located on Jacksonville's westside invest considerable time driving to and from JFRD's only training facility to maintain required certifications, to fulfill certain ISC training standards and to complete other continuing education. This lack of proximity effectively places the units out of service for an extended period and creates a void in the delivery of service, when emergency response units are away from their first-due response territories; it also places time constraints on the completion of on-site facility training. Establishing a satellite training center that is appropriately located to serve fire stations that are situated in the western and northernmost regions of the county provides a solution to complete training in less time or to complete more training while remaining in the closer proximity to first-due response territories.

PROJECT TITLE:

Development/Roadway

Cecil Field Rds & Drainage - Site

**CIE REQUIREMENT:** 

PROJECT LOCATION: Cecil Commerce Center DEPARTMENT:

Office of Economic Development

PROGRAM:

Roads / Infrastructure / Transportation

PROJECT COMPLETION DATE:

October 2018 **USEFUL LIFE:** 

20 Years

DISTRICT:

PROJECT NUMBER:

PW0416

#### PROJECT DESCRIPTION:

Preparing a new access roadway for the City-owned Mega Site, at Cecil Commerce Center. It includes the engineering/design work and clearing of vegetation and establishment of a road base, which will allow access to the area. Once road base is completed, work will include engineering, surveying, design and construction of a large stormwater pond for the City-owned Mega Site, at Cecil Commerce Center.

#### JUSTIFICATION

This will allow the City to develop a prime 400 acre tract of land, located at Cecil Commerce Center, valued at approximately \$40M (\$100K+/- per acre) and is currently inaccessible by vehicle. The subject parcel has been certified as a "mega site" via a lengthy process conducted by outside site selection professionals. In recent years, the City has been approached by multiple site selectors, representing large manufacturing companies, who were interested in the Cecil mega site. The City has been informed by those various site selectors and other real estate professionals, that this will increase the success of selling the mega site, if there was a drivable path to the property. Developing the subject 400-acre mega site could generate millions of dollars a year in new tax revenue and attract an end-user that would generate thousands of jobs. The Cecil budget will be minimally impacted with this proposed path/base installation. The work will not include any asphalt, lighting, drainage structures, etc. Most of the proposed expenditures are for future (formal) roadway design.

PROJECT TITLE: Mandarin Branch Library - **DEPARTMENT: Public Libraries** 

PROGRAM:

Renovation

**Public Facilities** 

CIE REQUIREMENT:

PROJECT LOCATION:

PROJECT COMPLETION DATE:

DISTRICT:

No

September 2018

PROJECT NUMBER:

3330 Kori Road

**USEFUL LIFE:** 50 Years

PL0013

#### PROJECT DESCRIPTION:

The Mandarin Branch Library opened in June 1986. Due to older outdated systems the Mandarin Branch Library is not operating efficiently, both in its physical systems and its set up for children, tweens, and teens. Collaborative areas for interactive work and study as well as separate study and meeting areas are needed. Upgrading the data infrastructure, replacing and upgrading electrical capacity is needed. Additionally an improved layout for public access computers, an e-classroom and closing off the Children's area are necessary to bring the Library into line with customer demand.

#### **JUSTIFICATION**

This project is based on a vision of a library that is a vital resource in this community – a springboard for educational and occupational success, an essential partner in creating learning experiences, the center of community life, and an outstanding public investment meeting the community's increasing demands for electronic information delivery, computer access, mobile device applications, and technological innovation. This project will inspire people to use the library in new ways. The areas needed are for individual and group driven innovation spaces that focus on expression and creativity in libraries. The core element is knowledge and culture and the ability to blend knowledge domains which would not normally be mixed. As this project is planned the outdated and inefficient HVAC, Plumbing and electrical systems would be replaced with new systems including solar hot water, low flow plumbing fixtures, and high efficiency HVAC systems.

#### PROJECT DESCRIPTION:

Create interactive literacy and learning spaces at the Highlands Library that is devoted to providing information and literacy materials in a hands-on experimental learning approach for early literacy, elementary educational achievement and tween services.

#### **JUSTIFICATION**

Libraries enhance the quality of life of the neighborhood in which they are located. Superior public spaces for children and teens increase the appeal of the neighborhood to young families looking to relocate. Free access to computers and cutting-edge technology helps bridge the digital divide and ensures that all students have the opportunity to achieve academic success. A well-educated citizenry earns more and is more stable economically. Study spaces, library resources, and access to technology at public libraries provide students with the opportunity to achieve academic success.

PROJECT TITLE:

Main Library - Collaborative Spaces

**DEPARTMENT:** Public Libraries

**PROGRAM:** Public Facilities

CIE REQUIREMENT:

PROJECT COMPLETION DATE:

September 2018

**DISTRICT:** 7

**PROJECT LOCATION:** 303 N. Laura Street

**USEFUL LIFE:** 50 Years

**PROJECT NUMBER:** PL0009 05

#### PROJECT DESCRIPTION:

Transform the space at Main Library 2nd Floor to Collaborative Work Centers - 4,000sf of interactive furnishings to provide access to knowledge, research, and collaborations for students or professionals.

#### **JUSTIFICATION**

Libraries throughout the country are transforming themselves from places where people consume information and obtain knowledge to places where they create information and put knowledge to work. These new spaces will amplify and complement smaller-scale spaces which are already being developed and they will bring together resources for small business owners and entrepreneurs in a way that has not been done before. The Collaborative Spaces project promotes economic development by bringing people together to connect, learn, and decide by providing collaborative ways to conduct business, teach, and learn.

A delay in the funding of this project would keep us from providing cutting edge experiences which promotes innovative growth.

PROJECT COMPLETION DATE:

### **JUSTIFICATION**

Originally constructed by the County/City in 1961, this is a unique structure made up of four distinct bridge structures. Recent inspections have noted serious decay issues. Several sections of the bridge structures are closed due in part to two bridge deck failures.

### PROJECT DESCRIPTION:

This allocation funds county-wide enhancements to City bridges. The enhancements are focused on City bridge improvements to ensure appropriate transportation operations throughout Jacksonville. The Public Works Department has developed a prioritization process to identify the most necessary needs. This project will also provide a funding source to address emergency repairs when necessary due to a bridge failure or traffic accident(s).

#### JUSTIFICATION

Bridges often have immediate needs for corrective maintenance and repair construction. The work is usually minor and, if performed in a timely manner, will prevent emergency repairs at a later date. It provides flexibility to address unforeseen needs rapidly, since the funding is already in place.

**CIE REQUIREMENT:** PROJECT COMPLETION DATE:

Ongoing

PROJECT NUMBER:

Countywide

**USEFUL LIFE:** 50 Years

PW0781 01

PROJECT DESCRIPTION:

PROJECT LOCATION:

This funds inspection/repair/replacement of the City's countywide bulkhead assets not limited to the St. Johns River. Funding will be used to evaluate and address failing bulkheads. Citywide bulkhead replacement (failures and poor countywide bulkheads).

**JUSTIFICATION** 

Bulkheads are necessary in order to prevent the erosion and loss of public and private property. Bulkheads also contribute to the prevention of unwanted sediment and pollutants entering our surface waters. Where structures are adjacent or in close proximity to the bulkheads, their stability often relies upon the bulkhead and it's effect upon the stability of the foundation and underlying soil.

## PROJECT DESCRIPTION:

This allocation funds the repair of existing deteriorated/damaged sidewalks throughout Jacksonville. Repairs to hazardous sidewalks include removing and replacing sidewalk panels and horizontal cutting. This effort helps to address pedestrian safety and mobility issues.

### **JUSTIFICATION**

The City of Jacksonville currently has an extremely large backlog in sidewalk repairs which could result in liability for citizen injuries. Repaired sidewalks will provide safer and more efficient pedestrian movement throughout Jacksonville. The repaired sidewalks will encourage companies to locate to Jacksonville. The project will decrease operating budgets in future years since the maintenance efforts that will be required on the sidewalk system will be reduced resulting in cost savings for maintenance.

PROJECT TITLE: DEPARTMENT: PROGRAM:

Roads / Infrastructure / Roadway Resurfacing Public Works

Transportation

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT: Various

Ongoing

PROJECT LOCATION: **USEFUL LIFE:** PROJECT NUMBER: PW0070 Countywide 25 Years

## PROJECT DESCRIPTION:

This allocation funds resurfacing of City roads throughout Jacksonville. The City is responsible for approximately 3,672 miles of paved centerline roadway and this funding is used for the resurfacing, micro-surfacing and rejuvenation of those roadways. Program Management Services for the Pavement Management program are also included in this project.

### JUSTIFICATION

The improved resurfaced roadways will provide safer and more efficient transportation throughout Jacksonville. The project will decrease operating budget in future years since the maintenance efforts that will be required on the resurfaced roadways will be reduced resulting in cost savings for maintenance. Also the improved resurfaced roadways will result in lower damage claims for vehicles due to problems with the deteriorated roadway surfaces such as potholes. The resurfaced roadways will encourage companies to locate to Jacksonville.

 PROGRAM:

 ADA Compliance - Public Buildings
 Public Works
 Public Facilities

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

No September 2019

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:CountywideNAPW075501

## PROJECT DESCRIPTION:

This project is to provide ADA renovations to various city facilities as agreed in the settlement agreement with the US Department of Justice (DOJ). During the compliance review, DOJ reviewed 64 of the city's facilities. The agreement requires the city to correct deficiencies identified at the 64 facilities and requires the city to review and correct identified deficiencies at hundreds of additional facilities. The agreement will remain in effect for five years. The DOJ will monitor the city's compliance with the agreement.

### **JUSTIFICATION**

This project continues to address repairs needed to ensure public facilities are ADA compliant. This will include items identified by the Department of Justice as well as the requirement to ensure all public facilities not inspected by them are brought up to code within 6 years.

PROJECT NUMBER:

PW0677

# PROJECT DESCRIPTION:

Countywide Capital Maintenance and emergency repairs to include hazardous material assessment, abatement, repairs under \$100,000, and the downtown core routine maintenance on major equipment.

### **JUSTIFICATION**

The City of Jacksonville's Public Buildings Division funds the maintenance and repairs for all City facilities. The importance of having funding in place for this project protects the building's infrastructure while providing funds for special, emergency and hazardous materials projects. If this project is not funded, the amount of deferred maintenance in City of Jacksonville facilities will increase.

PROJECT TITLE:DEPARTMENT:PROGRAM:Public Buildings - RoofingPublic WorksPublic Facilities

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

No TBD A

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:Countywide25 YearsPW003301

### PROJECT DESCRIPTION:

Countywide roofing repairs and maintenance needed to fund the existing roofing contract that allows for roofing repairs and maintenance to all City of Jacksonville roofs experiencing leaks. Locations addressed through this project will have less than \$100,000 in estimated costs.

### **JUSTIFICATION**

The City of Jacksonville's Public Buildings Division funds the water intrusion repairs for all City facilities. The importance of having funding in place for this project protects the building's envelope, one of the most critical building components. If this project is not funded, minor issues in the building's envelope could grow into a much larger concern very quickly making a facility uninhabitable. Many of the facilities owned by the City of Jacksonville are in need of roof repairs that could not be funded in FY14-15. Public Buildings is hopeful this request will be funded to be able to continue the repairs of these roofs to avoid more costly repairs in the future.

 PROJECT TITLE:
 DEPARTMENT:
 PROGRAM:

 Fire Station #4 - Roof Replacement
 Public Works
 Public Facilities

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

o September 2016

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:639 W. Duval Street25 YearsFR003602

# PROJECT DESCRIPTION:

Fire Station #4 is one of the oldest fire stations in the City and is being protected with the original brick which requires waterproofing by regrouting/sealing due to the cracks and deterioration of the surface over the years. This project is proposed to provide a new roof and waterproofing for Fire Station #4.

### **JUSTIFICATION**

The cost of completing the necessary repairs associated with this project will increase with delays due to additional damages done to the building and its contents as a result of water intrusions and other damages associated with a leaking roof.

Main Library - Water Intrusion

Repair

DEPARTMENT: Public Works

PROGRAM: **Public Facilities** 

DISTRICT:

PROJECT COMPLETION DATE:

PROJECT LOCATION: 303 N. Laura Street

CIE REQUIREMENT:

September 2016 **USEFUL LIFE:** 50 years

PROJECT NUMBER:

PL0009

## PROJECT DESCRIPTION:

Significant and lengthy investigation into reported water intrusion issues at the Main Library revealed challenges associated with windows, skylights and the exterior stucco. Following proper and complete evaluation of the challenged areas of intrusion, it was determined that some significant repairs would be necessary to address a "long-term" solution to the issues. During construction, inconsistencies were encountered with the stucco on the East wall that require additional funding to address.

### **JUSTIFICATION**

Repairs are needed as soon as possible in order to limit potential impacts from further water intrusion and to address the safety concerns associated with the Skylights and Stucco challenges.

PROJECT TITLE: Jax Beach Pier - Decking

Replacement

DEPARTMENT: Public Works

PROGRAM: **Public Facilities** 

**CIE REQUIREMENT:** 

PROJECT COMPLETION DATE: September 2016

DISTRICT:

PROJECT LOCATION:

PROJECT NUMBER:

503 1st Street N, Jacksonville

**USEFUL LIFE:** 10 Years

PW0348

Beach, FL

# PROJECT DESCRIPTION:

Access to the Jacksonville Beach Pier is one of the structures that enhances the quality of life for the Jacksonville community. This project is a result of the scheduled end of the recommended useful life span of the existing pier. Funding used to ensure the structural integrity of the pier allows it to continually meet its original purpose and functional use.

### **JUSTIFICATION**

The Jacksonville Beach Pier is at its end of useful life and presents a safety hazard for Beach goers. The city's Risk Management Division has paid related claims going back to 2010. The project will reduce the city's liability and provide savings on ongoing repairs and maintenance costs.

New World Avenue, Extension to

Chaffee

DEPARTMENT: Public Works

PROGRAM:

Roads / Infrastructure / Transportation

**CIE REQUIREMENT:** 

PROJECT COMPLETION DATE:

DISTRICT:

Ongoing

PROJECT LOCATION: New World Avenue to Chaffee

Road

**USEFUL LIFE:** PROJECT NUMBER: 30 years JECCC6

## PROJECT DESCRIPTION:

This project extends New World Avenue from its current terminus and extends the roadway as a two lane segment until it reaches Chaffee Road. The construction of this roadway is intended to encourage further development of Cecil Commerce Center. It will lay the framework for eventual widening of the roadway into a four lane divided section.

### **JUSTIFICATION**

Without the extension of New World Avenue, significant areas of Cecil Commerce Center will not be positioned for immediate development which could make our option less desirable. An additional \$1 Million is required to furnish wetland mitigation credits for the roadway.

PROJECT TITLE: DEPARTMENT:

PROGRAM: Roads / Infrastructure / Old San Jose Blvd. Improvements Public Works

Transportation

**CIE REQUIREMENT:** PROJECT COMPLETION DATE: DISTRICT:

Ongoing

PROJECT LOCATION: **USEFUL LIFE:** PROJECT NUMBER: PW0779 3400 Hendricks Avenue 25 years

## PROJECT DESCRIPTION:

This project develops a plan to construct an Old San Jose Blvd. north-bound right-turn stacking lane at the entrance to the Hendricks Elementary School. The traffic movement into the school has created a significant back-up out into the north-bound lane of Old San Jose Blvd. which has created a significant traffic concern for the area.

### **JUSTIFICATION**

This project will improve safety and traffic flow along Old San Jose Boulevard. Currently, traffic that attempts to enter Hendricks Elementary School through a left turn has no space to get out of the traffic lanes for through traffic. As such, traffic is impacted and safety in this area in compromised. This project will allow the traffic entering Hendricks Elementary School to access a turn lane and no longer restrict the through traffic to less available

Roads / Infrastructure / Chaffee Rd Public Works

Transportation

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

Ongoing

PROJECT LOCATION: **USEFUL LIFE:** PROJECT NUMBER: 30 years PW0780 Chaffee Rd near Cecil Complex

# PROJECT DESCRIPTION:

This project will ultimately be a widening of the existing Chaffee Road from a two-lane facility to a new five lane roadway. The FY15-16 funding will provide design funding to progress from the current 50% design completion to 100% designed status. Funding is also requested in FY 15-16 for permitting and real estate acquisition. Following years will request construction funding.

### **JUSTIFICATION**

The existing roadway is in poor condition and does not have the necessary capacity. This project will increase the number of available lanes to accommodate traffic needs. This project will also reconstruct the old roadway into a new facility.

Traffic Signalization - Traffic Signal

Retiming

**DEPARTMENT:**Public Works

September 2020

PROGRAM:

Roads / Infrastructure / Transportation

**CIE REQUIREMENT:** 

No

PROJECT COMPLETION DATE:

**DISTRICT:** 1, 6, 8, 10, 14

**PROJECT LOCATION:**Various locations within specific

Various locations within sp corridors

**USEFUL LIFE:** 5 Years

PROJECT NUMBER:

PW0235 03

### PROJECT DESCRIPTION:

Signal timing is the process of optimizing the operations of signalized intersections. The objective of signal timing is to respond to the demands of all types of motor vehicles, bicycles and pedestrians in an optimal manner. Signal timing strategies include the minimization of stops and delays, fuel consumption and air pollution emissions and maximizing progression along an arterial. According to the Institute of Transportation Engineers, Traffic signal retiming is one of the most cost-effective ways to improve traffic movement and make our streets safer. For FY 16, the Traffic Engineering Division intends to re-time the traffic signals at 4 major corridors: Moncrief Rd, Merrill Rd, Old St. Augustine Rd, and Riverside Avenue. Re-timing the traffic signals will maximize the intersection and corridor capacity, which is an improvement on capacity without having to add lanes.

#### **JUSTIFICATION**

Traffic signals on City corridors have not been updated for years. The current timing plans are based on traffic demands during the period the plans were developed. i.e. Riverside Avenue: There are 15 signalized intersection along this corridor for which the timing plan was developed back in 1999 Since then, there have been several developments in the area which require re-timing of the traffic signals in order to more efficiently address current traffic pattern demands.

Parks, Recreation & Community Services

Parks

**CIE REQUIREMENT:** 

No

**PROJECT COMPLETION DATE:** Ongoing project

ΔII

PROJECT LOCATION: USEFUL LIFE:

Countywide 20 Years

PROJECT NUMBER:

PR0597 01

# PROJECT DESCRIPTION:

This project is a countywide project intended to be used for maintenance, upgrades, and repairs associated with existing parks in Duval County.

Project repairs may include fencing replacement, playground replacement, gym floor surfacing, field renovation, restroom renovations, safety lighting trail repairs, and drainage improvements.

### **JUSTIFICATION**

The funding for the project allows the Department of Parks, Recreation and Community Services to upgrade and maintain current park facilities. This project allows for issues such as vandalism (playgrounds set on fire) to be addressed to ensure the safety of current amenities.

# PROJECT DESCRIPTION:

Development of trails, skate plaza, parking, ball fields, courts on the remediated land at Lonnie Miller Regional Park. This funding request will completed the design as part of the Lonnie Miller Solid Waste Cleanup project.

### **JUSTIFICATION**

This park is a regional park without adequate amenities. It is also a Brownfield site and is currently undergoing a remediation plan that will return the site into useable land. Once completed, this will allow for the recreational amenities to be developed at the regional park.

 Pottsburg Creek - Dredge
 Parks, Recreation & Community Services
 Parks

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

o September 2016

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:8540 Beach Blvd20 YearsPR0244TBD

# PROJECT DESCRIPTION:

Dredging a navigational channel along Pottsburg Creek between boat ramp at Beach Blvd and the St. Johns River. A section of the Creek and River is heavily silted in. This dredge project will enhance public access to the boat ramp. The design phase was previously funded by a previous Florida Inland Navigation District for the project "Pottsburg Creek Boat Ramp".

### **JUSTIFICATION**

This project provides safe navigational waterways for area residents. Dredging the Arlington Rover/Pottsburg Creek will provide increase access of the public to enjoy fishing, skiing, paddling and boating in this tributary of the St. Johns River as well as increased usage of the public boat ramp.

PROJECT TITLE: DEPARTMENT: PROGRAM: Parks

Sisters Creek Dock Relocation Parks, Recreation & Community Services

**CIE REQUIREMENT:** PROJECT COMPLETION DATE: DISTRICT:

October 2016

PROJECT LOCATION: **USEFUL LIFE:** PROJECT NUMBER: PR0109 8203 Hecksher Drive 25 Years

#### PROJECT DESCRIPTION:

Sisters Creek is one of Jacksonville's largest and most used boat ramps. Due to siltation that has occurred since installation of the floating docks, the docks now touch the river bottom at most tide levels. This causes the docks to lean at an angle rendering them unsafe to use and is beginning to result in damage to the docks and gangways. It also makes it difficult for transient, large boats to pull up to these docks so they can access the amenities offered at the park. Furthermore, this situation is causing an increase in turbidity as water levels rise and solids are suspended into the water as the docks come off the bottom. These floating docks need to be relocated further from the shore making them usable at all tides and to educe the environmental impacts caused by their current location. This phase of the project will construct and relocate the docks and pilings.

### JUSTIFICATION

The project has been identified as a need for the community. Due to siltation in this area, the floating docks associated with the boat ramp now touch the river bottom at most tide levels. This causes the docks to sit at an angle, rendering this unsafe to use and resulting in damage to the docks. Siltation also makes it difficult for transient, large boats to pull up to the docks so they can access the amenities offered at the park. This project will relocate these floating docks further waterward so it is usable at all tides.

County Dock Boat Ramp Improvements Parks, Recreation & Community Services

Parks

CIE REQUIREMENT:

PROJECT COMPLETION DATE:

DISTRICT:

October 2016

PROJECT NUMBER:

PROJECT LOCATION: 2400 County Dock Road

**USEFUL LIFE:** 25 Years

PR0620 01

## PROJECT DESCRIPTION:

County Dock Road Boat Ramp contains an old, unusable ramp on the St. Johns River with limited space for boat trailer parking while the adjacent water contains large pieces of submerged rip rap and partially submerged pilings that remain from a former dock. This project proposes to replace the deteriorated boat ramp, remove submerged structures, remove parking obstructions and designate a kayak launch. Additionally, there will be no removal of trees or any road improvements will not widen the roadway area.

### **JUSTIFICATION**

The existing boat ramp is no longer usable in its current condition so the project will replace the ramp. It will also remove existing navigational hazards to the ramp and improve parking opportunities for boat trailers.

## PROJECT DESCRIPTION:

Metropolitan Park Marina is a well used public marina in Downtown Jacksonville. Its wooden docks are more than 25 years old and have exceeded their life expectancy. This project will replace the existing wooden docks with floating concrete docks that will better serve the needs of boaters. Additionally, the project will include a design for a small fishing pier.

### **JUSTIFICATION**

Replacement of the docks will ensure continued services to boaters. During football season and special events, the marina is often filled to capacity where approximately 140 boats of varying sizes may use all available boat slips. The addition of a fishing pier will alleviate conflict with fishermen who currently try to fish from the docks, a violation of city ordinance.

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

lo February 2017

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:8414 McKenna Drive25 YearsPR0222TBD

### PROJECT DESCRIPTION:

The project will extend existing floating docks to accommodate regular use. The ramp has two fixed docks which have exceeded their life expectancy and are inadequate to facilitate maximum launches. The docks extend 10 feet into the water. This designed project intends to repair the fixed docks, replacing two small floating docks and to add 100 feet of floating dock parallel to the shoreline.

### **JUSTIFICATION**

Replacing and adding floating docks at this boat ramp will ease launching and retrieving, increase safety and provide more access for local boaters. This location is one of the busiest in Duval County, especially during fishing tournaments.

PROJECT TITLE:DEPARTMENT:PROGRAM:Drainage System RehabilitationPublic WorksDrainage

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT: No Ongoing Various

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:CountywideN/APW007201

### PROJECT DESCRIPTION:

This allocation funds countywide improvements to the city's stormwater drainage system. The improvements are focused on system restoration to ensure that all components function in accordance with their intended purpose. Components such as failed drainage lines and structures make up the majority of these improvements.

### **JUSTIFICATION**

The City's obligation as part of the NPDES permit requires maintenance to the Municipal Stormwater System. This funding is necessary to maintain positive drainage throughout the City in order to alleviate flooding of private and public property.

Valens Drive LID Public Works Roads / Infrastructure /

Transportation

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

lo Ongoing

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:Valens Drive50 YearsPW076401

### PROJECT DESCRIPTION:

This project is a neighborhood drainage improvement project, as well as a demonstration project for Low Impact Development (LID). Once completed, the project will improve drainage within the neighborhood, and because of the LID features, we expect positive impacts to the water quality for any stormwater discharges that leave the neighborhood.

### **JUSTIFICATION**

The primary justification for this project is to correct and improve drainage for the neighborhood. The secondary justification for this project is to use as a demonstration project for LID practices. Once developed, the City will be able to evaluate the effectiveness of LID techniques as a method to improve stormwater discharges for potential application to future City drainage improvement projects.

PROJECT TITLE:

Julington / Cormorant (Loretto Road

Conveyance & Pond)

DEPARTMENT:

PROGRAM: Drainage

Public Works

**CIE REQUIREMENT:** 

PROJECT COMPLETION DATE:

DISTRICT:

September 2019

PROJECT NUMBER:

PROJECT LOCATION: Julington Creek Basin

**USEFUL LIFE:** 50 Years

TBD TBD

PROJECT DESCRIPTION:

The intent of this project is to improve water quality and reduce flooding by improving conveyance under Loretto Road and installing a 2 acre off-line wet detention facility on Cormorant Branch. This project is expected to remove 7 structures from the 100-year floodplain and contribute to the pollutant load reduction required by the Lower St Johns River (LSJR) Basin management Action Plan (BMAP) and NPDES permit requirements. (Project CO-1B in MSMP)

**JUSTIFICATION** 

Surface water quality impairments and legal requirements to meet the BMAP obligations require the City to execute stromwater projects to meet pollutant load reduction goals. Flood Reduction LOS in Comprehensive Plan.

PROJECT TITLE:DEPARTMENT:PROGRAM:Septic Tank PhaseoutPublic WorksDrainage

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

o Ongoing

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:Countywide50 YearsPW071701

### PROJECT DESCRIPTION:

The intent of this project is to improve surface water quality by removing septic tanks that are contributing pollutants to existing surface water bodies. It is a requirement of the Basin Management Action Plan (BMAP) for both the lower main stem of the St. Johns River and many of the impaired tributaries of the St. Johns River.

### **JUSTIFICATION**

Surface water quality impairments and legal requirements to meet the BMAP obligations require the City to execute a septic tank phaseout program. This is a joint initiative between the City, JEA, and key stakeholders in the area.

PROJECT TITLE: DEPARTMENT: PROGRAM:

Trail Ridge Landfill Expansion Public Works Government Facilities

CIE REQUIREMENT: PROJECT COMPLETION DATE: DISTRICT:

No September 2019 12

PROJECT LOCATION:USEFUL LIFE:PROJECT NUMBER:5110 US Highway 301 Baldwin FL33 YearsSW000506

5110 US Highway 301 Baldwin FL 32334

PROJECT DESCRIPTION:

Trail Ridge Landfill has only 4 years of air space left for the disposal of solid waste; with 18 months of operational air space. The site has approximately 977 acres of which 400 are occupied by existing landfill footprint and supporting infrastructure. The remaining 577 acres is located to the north of the current disposal hill. The landfill expansion into this 577 acre area will provide landfill capacity to Duval County residents at the current lowest feasible disposal cost for approximately 33 years of capacity. The expansion of the existing hill to the north into the first disposal unit along the north face of the current hill will capture a "valley" and provide \$150 million in new revenue to the City for the first 5-10 years of operations. The hill is approaching the time frame when there will be no space available for the placement of the ash materials the City is required to dispose of per the Consent Decree with US EPA. Loss of the hill as the disposal site due to capacity constraints would result in an increased cost of \$15-\$20,000,000 to the ash program.

### JUSTIFICATION

Construction for expansion of Trail Ridge Landfill. The first phase is now being awarded. It is critical to have continuum funding to avoid mobilization and de-mobilization costs, and disruption of solid waste disposal capacity since the current hill will run out of usable space during the anticipated full construction time frame for all infrastructure and ancillary facilities for the expansion project.
