Below is my email sent on 7/29 to Michael Boylan. Just making sure you all get it along with the photos.
Our concerns:

- **The creek is a watershed that is now clogged with sand/silt**
- **Flood mitigation – many of us flooded in Irma and with the creek clogged it will inevitable happen again**
- **Hurricane preparedness – storms are likely very soon that could cause us substantial damage if water isn't able to properly drain**
- **Environmental effects – manatees and other larger fish etc can no longer come into the creek**
- **We have lost access to the St. Johns River – this devalues our property**

Thank you for helping us!

Laura Williams

Subject: FW: need your help, please!

Hi Michael,

We live at the mouth of Deep Bottom Creek (2524 Lynnhaven Terrace) in Mandarin. The creek is a watershed for the area. As a result of the enormous amount of rain we received yesterday/last night the creek has become completely clogged with silt/sand. The entire mouth is less that 1 foot deep! I've attached photos.

This area flooded in Irma so we're particularly concerned that without proper waterflow/drainage flooding again is inevitable.

I know there are flood mitigation and hurricane preparedness and flood abatement issues that have been approved for other creeks in the area to be dredged. Can we please be added to the list?

In the meantime, is there any emergency action that can be taken? We have a storm due to hit next week!

Thanks in advance for your help!

Following up again.....

I had opened a ticket prior to contacting you. That ticket was closed and I was directed to SJRWMD. They sent me to the DEP who have not returned my call or email. Several neighbors have also expressed their concerns with little to no response.

I am happy to arrange a meeting with Michael and the other committee members and our neighbors who are affected by this issue to discuss our situation and possible solutions. He would be able to see the creek first hand and understand our concerns.

Please help us.

Someone from the public works department will work on the ticket, which will probably consist of evaluating the situation by reviewing/visiting the site and will then continue with the necessary action plan of recommendation. I am uncertain if you'll be contacted or not. As our office is provided any updates, we will make sure to pass it on to you as well.

Good morning, Mr. Boylan.

I emailed last week regarding the issue we are having with sand/silt clogging the mouth of Deep Bottom Creek.

We are worried about flooding. We need help to get the creek dredged to improve the flow and avoid potential flooding. It's also an environmental issue. Manatees that we used to see regularly can no longer navigate the creek!

I look forward to your response.

Subject: Continued Flooding in Springfield

EXTERNAL EMAIL: This email originated from a non-COJ email address. Do not click any links or open any attachments unless you trust the sender and know the content is safe.

Good evening,

I'm writing this letter in the interest of getting the city to fix this horrific flooding problem at 7th and Silver St in Springfield.

My name is Olivia Clancy. I grew up in Springfield. My parents moved myself and my 4 siblings to Springfield when I was going into 6th grade back in 2000. They instilled in us a love of old houses and a love of Springfield.

My husband and I believe in this neighborhood. We met and fell in love at a Porchfest event. We married in my parent's house. My husband's band marched my sister's wedding procession down silver to the old women's club. My sister lives on Laura, my brother on Market, my parents just a few blocks from us on Silver.

My husband and I are, first and foremost, taxpayers. We are also both teachers, respectively teaching art and music at Kirby Smith Middle. Myself, my husband, and our 2 year old daughter live at 1641 Silver. My husband and I renovated this house for two years. We finally moved in back in October.

Our hearts are breaking watching our life's investment flooded. We have now taken water onto our property and underneath our home. We are more than concerned for the safety of our family and our property. We have put in several tickets with the city to no avail. Please fix this problem. It would be a sad day when people no longer care, we still do.

Thank you,
Olivia Clancy

Subject: Deep Bottom Creek

EXTERNAL EMAIL: This email originated from a nonCOJ email address. Do not click any links or open any attachments unless you trust the sender and know the content is safe.

Dear City leaders and water conservationists, and drainage specialists,
What's happened to the weir that was installed on San Jose Blvd? It was supposed to slow the flow of water down Deep Bottom Creek to prevent the buildup of sediment and keep the watershed functioning. Recently several more tons of builder's sand have washed down the creek to be deposited around our docks and across the channel outlet to the St Johns River. In fact, the entire mouth of the creek, once 15 feet deep, now so shallow now you can walk across it, is clogged. Previously, manatees came deep into the creek to feed and were often seen with their young at the mouth of the creek where there used to be an island and an underwater spring. (Now nowhere to be found.) This watershed serves a huge area. We need help to unclog this creek and avoid imminent flooding. Also, our docks are getting stressed by the weight of the sand building up against the pilings. We would so appreciate your help. Katharine Jones

EXTERNAL EMAIL: This email originated from a nonCOJ email address. Do not click any links or open any attachments unless you trust the sender and know the content is safe.

Hello all members of the Resiliency Special Committee—

My husband and I are writing to ask for assistance with Deep Bottom Creek here in Duval County. We have lived on Deep Bottom Creek since 2011. And year after year, the creek continues to fill in with sand/silt. But this last storm has **completely clogged** this creek which is a watershed. Not much of a watershed now.

We, along with many of our neighbors, flooded in the Irma storm. Our home was surrounded by water on all sides, with no where for the water to go. It is inevitable that flooding is sure to happ again with the creek completely clogged now. We don't feel that we can rightfully plan for hurricane preparedness what can we do if the water can't drain properly?

There are really several issues that we face in addition to more flooding. The manatees and other fish can no longer come into the creek. And, we personally have lost our access to the St Johns River which devalues our property value, as well as the property values of our neighbors.

It is our understanding that several drainage systems from parking lots on San Jose Blvd pour into this creek (Walmart, Emergency Center, Cancer Center, shopping center). The impact of this creek being clogged is honestly affecting more than us but all the residents of Mandarin who use any of these locations on San Jose Blvd. The drainage and stormwater systems in Mandarin are directly impacted by the clogged creek.

This committee's charge is:

"to evaluate drainage and flood control; tidal impacts and water levels

in the St. Johns River; the effects of failing or deficient drainage infrastructure and improvements, the loss of wetlands and natural habitats; and development activities within the floodplain

and to offer recommendations as to opportunities for maintenance and preservation of wetlands and floodplains and various drainage and stormwater system improvements, which would contribute to the resiliency of the St. Johns River and Northeast Florida."

Please help us preserve our creek, our wildlife and the impact this all has on the community of Mandarin. The entire creek needs to be dredged. We are available for any questions or meetings. Please feel free to contact us:

Rick Karstedt 904-887-5564

Subject: sand build up in the creek - looking for help

EXTERNAL EMAIL: This email originated from a non-COJ email address. Do not click any links or open any attachments unless you trust the sender and know the content is safe.

Hello Mr. Boylan,

As our city council person and a member of the Resiliency Special Committee, I am reaching out to you for assistance.

We are quickly approaching a season of heavy rains and our community is in a state of need that could easily turn into another flood disaster for our homes.

Our neighbors, along with me and my wife, reside on a creek that runs off of the St. Johns River in the Mandarin area of Jacksonville. The creek is currently a watershed that is now clogged with sand and silt. Many of us flooded in Irma and with the creek clogged as it is, we will inevitably flood again. As we have prepared for hurricane season, we are very aware that storms are likely to hit soon and could cause us substantial damage if the water cannot properly drain. This also results in environmental effects that enable our manatees and other larger fish, etc. the ability to come into the creek area. We have lost our access to the St. Johns River which as I am certain you can understand, has devaluated our property. We have followed the appropriate guidelines by opening a ticket with the city through your assistant, however we believe this situation is one that needs to be addressed immediately.

Please understand that our entire community on the creek, **all of us**, are seeking your help. The Resiliency Special Committee's charge is:

"to evaluate drainage and flood control; tidal impacts and water levels in the St. Johns River; the effects of failing or deficient drainage infrastructure and improvements, the loss of wetlands and natural habitats; and development activities within the floodplain and to offer recommendations as to opportunities for maintenance and preservation of wetlands and floodplains and various drainage and stormwater system improvements, which would contribute to the resiliency of the St. Johns River and Northeast Florida."

Sincerely,

Subject: Media Advisory - WJCT & NEFL Regional Council Host ADAPT Forum to Explore Climate Change and Coronavirus on Tuesday, July 14, 2020

EXTERNAL EMAIL: This email originated from a nonCOJ email address. Do not click any links or open any attachments unless you trust the sender and know the content is safe.

Good morning -

I hope this email finds you well. WJCT and Northeast Florida Regional Council are hosting an ADAPT forum tomorrow, July 14, 2020 at 7 p.m. focused on the parallels between, and the intersections of, [climate change and the coronavirus](#). See media advisory below in the body of this email for additional information. We thought you would be interested in what measures the state of Florida and the Jacksonville metropolitan area are undergoing to manage these crises. We invite you to log on and join the conversation via zoom tomorrow evening. Please RSVP by 5 p.m. on Tuesday, July 14, 2020.

Best Regards,
Neily

MEDIA ADVISORY:

ADAPT Forum to Explore Climate Change and Coronavirus
July 14, 2020 | 7 p.m. | Virtual Panel via Zoom

WHAT:

WJCT Public Media and the Northeast Florida Regional Council will present an ADAPT forum focused on the parallels between, and the intersections of, [climate change and the coronavirus](#) — and how these crises are affecting the state of Florida and the Jacksonville metropolitan area. Those who attend the zoom meeting are invited to participate in the conversation and ask questions through the chat feature.

WHO:

The forum will be moderated by [WJCT News](#) reporter and lead [ADAPT](#) reporter Brendan Rivers and Sean D. Lahav, MPA, Resiliency Coordinator for the [Northeast Florida Regional Council](#).

Panelists include:

- [Dr. Aaron Bernstein](#), Interim Director of the Center for Climate, Health, and the Global Environment at the Harvard T.H. Chan School of Public Health (Harvard C-CHANGE)
- [Dr. Athena Masson](#), Florida Public Radio Emergency Network (FPREN) meteorologist and hurricane/extreme weather specialist
- [Dr. Richard Weisskoff](#), Professor at the University of Miami, Chairman of UM's International Studies department

WHEN:

Tuesday, July 14, 7-8:30 p.m.

This event will be presented for free, but advance registration is required by 5 p.m. on July 14:

<https://www.eventbrite.com/e/is-there-a-connection-climate-change-and-coronavirus-tickets-111685654800>

WHERE:

This forum will be presented via Zoom. Login details will be emailed to registrants at 5 p.m. on July 13 and July 14.

VISUALS:

ADAPT graphics, WJCT News 89.9 logo files and headshots of participants are available for download [here](#).

A video recording of the panel conversation will be available to participants following the event.

I heard the news report this morning regarding the approval of three subcommittees for the Resiliency Special Committee in the City of Jacksonville. I would like to offer my experience and skills for this effort.

I am a retired manufacturing executive and have lived and worked in Jacksonville since 2006. My 35+ year career includes multiple trainings and experience in each of the three areas targeted; Environmental, Infrastructure, and Education/Outreach. My preference would be for either of the latter two, but I would gladly contribute wherever the committee feels I may be best utilized.

Please advise if there is a formal application process I should follow. I have attached my resume and I may also be found on LinkedIn. Thank you in advance for your consideration.

To anyone who cares, 5/28/2020

To the Honorable Matt Carlucci and anyone else who thinks to have super duper small subcommittee meetings at remote locations out of the Sunshine then report back is a good idea. The establishment and the volunteering of hosting these remote subcommittee meetings should be a HUGE concern. The most recent example has to be 2020-148 and the Mark Middlebrook letter of recommendation to sell Conservation lands. How does that help with Resiliency? Please share that letter. What was the response of any from our Riverkeeper Lisa Rinaman? How about Kay Ehas with Groundwork JAX? Should we be immediately looking for Public Access Resiliency opportunities on Hogans and McCoys Creek?

Not picking on you Mr.Carlucci but this was done in other subcommittee meetings originating out of Waterways and the exact opposite NEEDS/SHOULD happen.

On a side note.

Tomorrow is the CRC-Charter Revision Commission. The Chair is Lindsey Brock a member of Waterways. From day one I was advocating for a CHARTER amendment that any CRA/DIA/ UCDA-(Urban Core Development Authority) that has a Waterways component and taxpayer money is given to an entity that has a Waterways component then PUBLIC ACCESS to that Waterway WILL/SHALL be guaranteed to Joe Q. Public. 2013-384 and the armory for a buck and ZERO access to Hogans Creek is a classic example.

Please, Mr. Carlucci as the Chair at least mention this today at YOUR RESILIENCY meeting. An emergency Resolution of support can at least be brought to the CRC for their 5/29/2020 meeting.

Respectfully submitted.

Sincerely,
John Nooney
