- Action Items for Sub-principle 2.5:

 1. Prioritize brownfield sites for redevelopment based on extent of contamination and remediation efforts and potential for redevelopment.
- 2. Develop a strategy to access federal and state funding for brownfield sites.
- 3. Create redevelopment plans for sites based on available funding sources.
- 4. A 40-are parcel of land on the St. Johns River which connects to a small tributary of the river can be redeveloped as a park to provide public access to the water and additional recreation space. Residual land may be used to house alternative energy sources like solar panels.
